

POWER SCOPE™ 2

CLASS II CORRECTION SIMPLIFIED

PowerScope 2 delivers simple, efficient Class II correction like you've never seen before. The latest generation of PowerScope features a stronger wire attachment nut and visual activation indicators.

- Fixed one-piece, one-size-fits-all design
- Easy chairside wire-to-wire installation
- No assembly or lab setup required
- No headgear or special band assemblies
- Use with banded or bondable molar tubes
- World-class clinical results

NEW **MAGNETIC FEATURE**

Magnetic sleeve slides onto driver for secure hold of appliance during installation.

FEATURES AND BENEFITS

- One-size-fits-all Class II corrector for simple treatment application and easy inventory management
- One-piece, no assembly required, and no need for lab setup
- Internal NiTi spring mechanism delivers 260 grams of force during treatment
- Connects wire-to-wire for quick and easy chairside installation
- Can be used with both bondable or banded molar tubes
- No molar headgear tube required
- Telescoping mechanism will not disengage during treatment, helping avoid emergency visits
- Unique ball and socket joint for unrestricted movement and patient comfort
- Fatigue tested to ensure durability during treatment
- Can be used for unilateral or bilateral correction
- Works with fully bonded cases
- Crimpable shims available for activation of spring during treatment
